The Basic Roamer© AR

As the Official Navigation Tool of the USARA, the design of the Basic Roamer© AR has been carefully considered for US Adventure Racing and has over 20 major features. Originally developed for rallying in Europe this tool is now customized and available for the US Adventure Racer. Rally navigators must make split second navigation decisions at very high speed and any errors can be very costly to crew, car and team. With these challenges in mind it is easy to see how the Adventure racing navigator can benefit from the Basic Roamer© AR. www.BasicRoamerAR.com

The Adventure Racing MTB Map Holder

A lightweight, patent pending designed that allows a map to be read while sitting on the bike. It easily mounts to the handlebars and can accept cutouts for lighting systems and other accessories. Designed to fit almost any mountain bike, it is built strong enough to withstand the rigors of any adventure race or bicycle orienteering event. The solid construction will not flex or flap on rough roads and will hold most flexible map covers or just the map itself

Proven in many races and successfully used in Explore Sweden 2005 and PQ 2006 by Team Nomad

The Adventure Racing Waterproof Pedometer

Now you don't have to guess or time your travel to the next CP, you can know exactly how far you've gone. Most pedometers fail completely when they get near water. We've developed one that actually works when wet. It even survived the full course at Primal Quest.
